

Subject:	Class:	Teacher:	Date:
Science			

Pupil Voice	Feedback
What is science?	
Are you a scientist? How do you know?	
Do you enjoy science? Why?	
What are you currently learning about in science? Why are you learning this?	
What prior knowledge did you have about ...?	
Did your teacher ask you if you knew anything about this before the lesson started?	
Were you able to share with your teacher/the class what you already knew about ...?	
What new knowledge have you learnt this term or in this topic?	

	Feedback
So far this year, what has been your proudest achievement in science?	
Can you show me a piece of work that you are proud of in science?	
Can you give me an example of where you carried out a scientific investigation recently?	
Can you give me a recent example of when you have [key skill from progression framework]?	
How often do you do experiments? Can you give me an example of an experiment that you've done recently?	
What do you think you learn from carrying out an experiment?	
How do you know that the work you have done in science is good?	
Is the work that you do in science challenging, too easy or too hard?	
Do you often wonder how things work?	

	Feedback
Can you tell something that you already know about science?	
Why do you think you have remembered this knowledge?	
Where does electricity come from?	
How can science help people overcome problems in the world?	
Can you tell me about a famous scientist who has had a big impact on our country or the world?	
Do you ever use computers or iPads for science?	
What is in the classroom that can help you find out more about science?	
Where can you find science books in school?	
If the school could keep one element of how we did remote/online learning in science, what would it be?
